CLIPS -- QUOTES -- COMMENTS

E - 2

July 15, 1955

CONTENTS: PAGES:

The Einstein - Russell Statement and A Quote from the M.P. Controls . . . . . 1 - 2

Action and Re-Action In "Nature Cure" (from "Prediction" magazine) . . . . . - 2

Window-Pane Crack and The Deros & The VAU Communicators . . . . . - 3

Letter from Geo. H. Williamson Telonic Research Center - . . . . . - 4

UFO Over S'ta. Catalina Channel -- "The Ether & Its Vortices" (Dr. C.F. Krafft) -- An Unpublished MS -- . . . . - 5

Le Courrier Interplanetaire - (a quotation) . . . . . 5 - 6

"The Flying Saucer Review" . . . . . - 6

MISCELLANEOUS:

BOOKS -- PUBLICATIONS, etc. . . . . - 7

********** ********** ********** **********

"CLIPS, QUOTES, and COMMENTS" is issued on the first and fifteenth of each month, by the Borderland Sciences Research Associates, at:
-- 3524 Adams Ave., San Diego 16, California.
- Twelve issues (6 months) for $5.00;- Six issues (3 months), $2.50; two issues for $1.00. --(Back issues available at 4 for $1.00-but limited supply). "C.Q.C." contains, as a rule, only short articles & miscellaneous material supplementary to the BSR bi-monthly ROUND ROBIN and in the field of Borderland research interests.

THE EINSTEIN - RUSSELL STATEMENT:

Most of our Associates have by this time read the text of this appalling and rather despairing document. It is preceded by a statement to the press summarizing the principal points. It is important to notice that the argument is not based so much on the actual combat use of atomic or hydrogen bombs, as on their after effects.

The public alreadyhas grown somewhat accustomed to the idea of the total de - struction of such cities as New York, Chicago, London, and Paris; but the real danger that the planet may become uninhabitable has made little impression. This could re - sult from the fall-out in dust and rain from radioactive clouds - and our inference would be that experimental and 'peaceful' bomb tests are as dangerous as any other, apart from immediate destruction.

"It is feared that if many H bombs are used there would be universal death... We have found that the men who know most are the most gloomy. . . Here then is the problem: shall we put an end to the human race, or shall mankind renounce war?. . . Whatever agreements had been reached in time of peace, they would no longer be con- sidered binding in time of war. . "

"We have to learn to think in a new way ... to ask ourselves not what steps can be taken to insure military victory, for there no longer are such steps ... but rather, what steps can be taken to prevent a contest the issue of which must be dis- astrous to all parties. . . The obliteration of great cities would be a minor disas- ter, of sudden death for the minority, but for the majority a slow torture of dis - ease and disintegration".

The letter actually was a call for a conference of scientists, and was sent to the heads of government of Britain, Canada, Communist China, France, Russia, and the United States. 28 signatures had been solicited (of eminent scientists); eight joined in the plea, nine refused to sign; three did not reply.

According to the press "Congressmen and government officials happily endorsed the plea". However, several Senators pointed out that "For the last 30 years we have had people suggesting that we renounce war" (Kellogg-Briand pact, and League of Nations) (Sen. H.M. Jackson) ... that there remains the "practical problem of deal- ing with aggression in all its devious modern-day forms - subversion, infiltration and revolution (Sen.Albert Gore). . . (These are, of course, completely obvious com- ments which contribute nothing and will be repeated a thousand times. But from whom can we expect more, and who is to be blamed for their futility?).

Knowing the interest of our Associates in the opinions of the Mark Probert Con- trols - and in view of the very grave character of the Einstein - Russell statement, and of the world-wide publicity it has received, I now take the liberty of releas- ing a recent statement by these same Controls - though hitherto withheld by their instructions. First let me say, that the Controls do NOT expect a world war with nuclear weapons - but this welcome announcement by no means solves the world problem. It is in the nature of a prediction, which has yet to be translated into fact, belief. and appropriate action. It is a note of hope and encouragement for many of us, but the chief menace in the world situation remains untouched by it. This MENACE, in the minds of many, is to be identified with what is called the GREAT ACCIDENT - and it is to this "Accident" that the Controls refer in their two following paragraphs:

Statement by the M.P. Controls (May, 1955):

The so-called Great Accident is not necessarily a sudden catastrophe and without warning. It will probably involve the gradual destruction of the Life Force in the atmosphere (by atomic energies). This will change the genetic pattern of all earth life - man, animal, and vegetable. Destructive growths, far worse than cancer, will appear in all organisms. This period will probably end in disasters of cataclysmic scope. But prior to that event, the Etherian craft will remove all who wish to be removed, to a planet outside of your solar system.

Many scientists are working on means of releasing still higher energies than are now known. Some of these men are reincarnations of the entities who disregarded the warnings of the Overlords of the Etheric, and persisted in creating and experimenting with the life forms of your globe. They are still driven by the compulsions of wilfulness, and no governmental edict can restrain them. The end of your planet considered as an abode of Man, is "predestined" - in the sense that the nature and charcter of Man himself makes it inevitable. We see no present possibility or reason for avoiding these conclusions.

- end -

We might add here another statement made by the Controls, and allegedly by our Etherian visitors themselves, that they (the Etherians) will not permit a global war involving the use of nuclear weapons, and if necessary will intervene to prevent it - their reason being, not so much any concern for us and our civilization, but rather their desire to preserve our planet as a useful and functioning part of the solar system.

- - - - - - - - - - - -

Action and Reaction in 'Nature Cure'. (Harry Benjamin).

PREDICTION magazine for July, '55, contains a brief but important statement concerning this law of healing. "When disease is present and proper methods are applied, the disease seems to get worse at first before beginning to get better." This principle, of course, is recognized in Homoeopathy as well as in Nature Cure, the idea being "to let the symptoms work themselves out of the body" by increasing their vigor. The healing itself is carried out via the etheric body, although the symptoms are exhibited in the physical.

The basic weakness of Allopathy ('orthodox'medicine) is its concept of the germ theory as the basic cause of disease, and its necessity of treating the symptoms as if these were identified with the disease itself. The next great advance in medicine (to quote Dion Fortune) will be the 'discovery' and recognition of the etheric body. It is highly probable, and accepted by all occultists, that disease arises first in this body or in a higher 'vehicle', and medical practice not based on this fact is certain to be fumbling and indeterminate.

The special point of the PREDICTION article concerns the increase in severity of sympt oms under 'natural healing' and homoeopathic treatment. The facts are familiar but often misunderstood.

A familiar criticism of the dictionary as literature, is that 'while interesting, it changes the subject too often.' "Clips & Quotes" has the same defect or at any rate the same characteristic.

WINDOW PANE CRACK HEALS ITSELF - is the heading of an item printed in The Arizona Republic: AP dispatch from International Falls, Minn.

.... It was Thursday that lightning hit the plate glass display window. Mrs Kline and Fire Chief Vernon McMicken said it opened a crack about an eighth of an inch wide which extended about eight feet down through the window. A flash of light streaked through the store at the time, passing between Mrs Cline and a customer at the front of the store. It was more like a flash than like a bolt of lightning. No one was hurt and nothing in the store was scorched. . . It was raining at the time. . . About 20 other people saw the crack.

A glass firm was called to replace the window, but when the workmen arrived a half hour later the crack had disappeared. In its place was a dark streak. "It was like a pencil mark and we couldn't rub it off", said McMicken. "Then the streak began to disappear too, until today there was nothing left of it. You can rub your fingers across the window and there isn't the least trace of a crack. We know for sure the window wasn't replaced. I've never seen anything like it - never."

"Sounds like we're ready for a montal hospital - but if we are, you'd better send a big bus. About 20 of us saw that crack . . ."

(Assoc. Dr.P. Cosman)

(That second and last 'crack' - about the bus -
sums up a predicament now getting too-common-for comfort. We are reminded of an a propos verse:

"The situation of our time
Surrounds us like a clueless crime . . " !!!

THE DEROS AND THE VAU COMMUNICATORS. (The Communicator was not identified, but he is not a member of the Mark Probert group of Controls, nor was Mark Probert present at this meeting. The statements made are summarized below, for whatever of interest they may contain - the questions being omitted):

. . . .'Yes, the Deros exist. Yes, they have physical bodies like your own in most respects. Yes, they inhabit caverns and underground regions. And the machines exist.

... 'The Deros are degenerate descendants of the Atlanteans.

'The caverns are widely distributed, but there are foci and I will name them. The Black Forest - Alpine regions - Central America - Korea - Siberia - Iran - and especially San Sebastian and nearby regions.

'The situation is this: The Deros are nearly mindless - degenerates. Hence they are prey to (some types of) Astral entities. All this gathering trouble originates among the latter. The machines are now completed creations, as thought - forms on the Astral. These forms are being projected upon the Deros with the idea that the latter can be controlled to the point of constructing the machines in dense matter. Or of conveying the vision of the machine to earth people until some one constructs a working model. This would be a great disaster. As a precaution, pay no attention to the visions, and none to the Deros. Invoke the Powers of Good. The Deros constitute a nexus with the evil forces of the Astral. If you attend to them, you strengthen this bond and create one for yourself. . . Extreme cruelty as practised in war is a result of a kind of Astral invasion of the minds of the leaders - an obsession deliberately invited... '

LETTER from Dr. G.H. Williamson: Excerpts. (7-4-55)

'Thank you for mentioning our group. We are putting out a Quarterly Bulletin, at $2.00 per year. This will carry vital information that I feel your readers will want to know.

At the present time we are transmitting and receiving on our Master Unit Communicator. This device employs optical and electronic principles and utilizes infra-red and ultra-violet light beams. Space scientists say that infra-red is the perfect medium for planet to planet communication.

As you know, orthodox science believes that we must develop tremendous 'brute force' in order to go into space with rockets or to contact other worlds - that we must have many thousands of watts! However, this is not true. It is the TYPE wave used that is important - not the power of the wave, etc.

Infra-red can and will reach our neighboring worlds. In our Master Unit Communicator we have developed a device that can be used for astrophotography, astronomical observation, terrestial observation, interstellar communication, and communication with the UFO in our atmosphere. Even radiesthesia experiments are planned using this device as a 'transmitting' mechanism for certain chemicals, healing solutions, etc.

At the present time our Electronics-Radio laboratory is located at Tijeras, New Mexico. A. David Middleton, formerly a Director for the American Radio Relay League, is our engineer in charge there. We have started what Dr. Jessup is very much in favor of: The UFO Patrol or Radio Network. Interested 'ham' operators and amateur astronomers all over the world are being notified, and we feel much good will result from such a network.

Perhaps some of your Associates who are amateur operators will be interested in such a project. If they are, have them contact me in Prescott, Arizona - or, contact A. David Middleton, W 5 CA, Tijeras, N.M. We are now in communication with some very prominent men, who say there should be astounding developments ('saucer-wise') soon. 1956 will be a year of important events, I'm sure.

With reference to our Bulletin: if people will send in their subscriptions of $2.00 we will have the Fall Issue sent out to them very soon. It is called Bulletin of the Telonic Research Center.

Two aircraft technicians from New York City are here now, working with us, and several AEC scientists are assisting at the laboratory. Prescott houses the Master Unit and direct communication will be handled in Prescott, while network communications Hdqrs. for 'hams' will be W5CA, Tijeras, N.M. We are working now on full scale experiments with the Society of Metaphysicians, LTD, Archer's Court, Hastings, Eng.

---------- G.H. Williamson.

The BSR Directors enjoy the confidence and cooperation of the English Society referred to, and recommend their publications: we shall try to report also on the work of the Telonic Research Center and suggest that all Associates with technical background subscribe to their new Bulletin.

Dr. G.H. Williamson can be reached at 849 Danita St., Prescott, Arizona.

(As an item of possible interest to BSR Associates: More than eight years ago the M.P. Controls suggested the use of light rays, and particularly of the infra-red, as the most feasible way of getting into communication with the people of the Discs and other aeroforms). ml.

Flying Saucer over the Santa Catalina Channel.

The Los Angeles Times of 7-10-5 prints this item. A tax counselor named George Washington, reported that a saucer-like object swooped down and hovered over his craft, the 20-foot Lucky W, at about a 2000 ft. altitude. It was gray-white in color and spinning rapidly on its own axis with fumes tailing out from each side. Seen for 16 min., and observed with field glasses by Washington and his wife for about six minutes.

(Our understanding is, that local papers can print local incidents of this sort, but that the national wire services will not carry them.

MAX LONG'S NEW BOOK. This book is titled Growing into Light, "for that is exactly what it is planned to help the average busy student to do", according to the Huna Bul. 113, pg. 7. "It is a direct path to a definite and very real goal, and it is aimed at stopping the endless circlings in the maze of 'modern teachings. The book is so simple that a child can read and understand it, but what it contains is a road map with every crossing marked so plainly that one cannot go astray." Publication about July 15. Price; $3.09. Order from HUNA RESEARCH PUBLICATIONS, BOX 875, Vista, Calif.

(If the foregoing description were a publisher's 'blurb', or came from almost anyone except Max Long, I wouldn't believe it; as it is, I'm sending Max the $3.09 by next mail).

- - - - - - - - - - -

Assoc. Rolf Telano has been circulating an unpublished manuscript, among friends of many different faiths and 'schools', with the idea of eliminating objectionable portions. "I found", he writes, "that if I eliminated everything they found objectionable I would be left with scarcely more than a front and back cover."

This could easily be interpreted as a very fine recommendation. However, one of the best pieces of writing we have ever published, on the subject of the aeroforms, was done by R.T. (title: The Flying Saucers): 11-page brochure, 8½ x 11". We have a few copies left, @ $1.00 - cheap at three times that price IF the 'Saucer' problem is important to you. (Order from B.S.R.A.- 3524 Adams ave., San Diego 16, Calif.)

We call the attention of mathematicians and physicists to THE ETHER AND ITS VORTICES, by Carl Frederick Krafft; a printed and neatly bound booklet of 65 pages, with numerous diagrams and bibliography. "The writer takes the materialistic view for granted and will proceed with the assumption that the external objective world really exists. . . Nature is psychical as well as physical" and the evolution of these two phases takes place simultaneously. "One is just as real as the other. Both are aspects of Nature, and more specifically of the ether. . . . The existence of an ether is a logical necessity and does not involve any contradictions... There is no justification for the present-day uncertainty as to its existence . . "

This treatise is highly technical and seems to me to be highly important. No price stated in copy received by us; but inquire of the author: Route 2, Box 687, Annandale, Virginia. (ml)

Le Courrier Interplanetaire (Prof. Alfred Nahon, Director), of June 27, '55, has the following editorial comments:

"Only the hardy souls - or the weak ones - sceptics and scoffers, do not know

---

THE COMING OF THE GUARDIANS: Only one explanation, satisfactory for both science and metaphysics, has ever been offered for the incursion of the Aeroforms - the one given in 1946 by the Mark Probert Controls. Summed up in a 64-page mimeo. book issued by the BSR Hdqrs. - $3.00.

or do not want to know that every nation now possesses an official commission of inquiry on the subject of "flying saucers". The American commission, reorganized in 1949 under the name of Project Bluebook, had Captain Edward J. Ruppelt at its head. In a letter addressed to the American magazine CRIFO he wrote: " I can categorically deny that the "flying saucers" are an American product, or the product of any other Power. . . Visitors from Space are perhaps not yet among us, but we can reasonably expect that they will be here tomorrow."

"At the same time, on January 25, 1954, the Ministers for War and for Air, of Great Britain, forbade all service personnelfrom making public any personal observations of "Saucers". Four months afterward, a meeting of airline pilots was held near London, which addressed a demand to the Minister for Air for the revocation of this order. Nearly all of these English airmen believe that the "Saucers" exist, that the authorities know it, and also know what they are. And on May 23, 1955, a British official of Ministerial rank was quoted as saying:

> We believe, on the basis of all information received, that the so-call flying saucers are piloted by little men, probably less than four feet in stature. It is frightening, but there is no doubt that the "Saucers" come from another planet. . .

The editorial we are quoting continues in a similar vein for several pages. It is instructive, though discouraging, to compare the (at least occasional) frankness of the European press with the soggy secretiveness of our own.

THE FLYING SAUCER REVIEW is to be specially recommended for its selection of foreign news. Published every other month at 1 Doughty St., London W.C. 1, Eng. Annual subscr., 1 lb. 1 s ($3.00).

A note from this REVIEW, though familiar, is worth quoting: "The nearest fixed star from which the "Saucers" could come is four and a half light years away. The fastest conceivable rocket space ship would take a century over the trip, and would have to be 30 miles long and four miles wide. . . Cigar shaped objects approaching these dimensions have been reported on many occasions at extremely high altitudes with disc-shaped craft flying to and from them."

If the data force us to accept the existence of enormous space craft many miles in dimensions (and they do so force us), it is clear that their construction lies far outside any science and engineering known to our planet. The speed and manouvers of the disc-shaped craft impose strains which no materials and construction known to us can sustain. The means of propulsion are not available to us. The alteration of shapeand "mat and demat" cannot be achieved by us. The evidence points to the utilization of forms of matter unfamiliar to us, by forms of energy equally strange.

It is only the so-called Etheric (or "4-D") interpretation of the phenomena which can meet the demands of the data so far at hand.

Associates wishing to purchase THE CASE FOR THE UFO, by M.K. Jessup, please order from THE CITADEL PRESS, 222 - 4th Ave. New York 3, NY. Price $3.50. (Do not order from BSR Hdqrs.). Ask the publishers to send you a free copy of THE UFO. REPORTER.

*** We have purchasers for copies of COSMIC CONSCIOUSNESS, THE SECRET DOCTRINE, and DWELLER ON TWO PLANETS. ----

Many Associates have sent us used books with permission to sell and apply proceeds on BSR operating expenses. This has proved very helpful indeed. Don't forget about it, if you have books in the field of BSR interests which you no longer need.

MISCELLANEA:

"C.Q.C." E-2
July 15, 1955

Continuing with our note, bottom of page 6. We are compiling a NEW AND COMPLETE BOOK CLEARANCE LIST, which will be sent out along with the next issue of Round Robin, August 1, 1955. - Books reaching us by July 26 can be included in this list. --

ORDERS FOR BOOKS advertised by us should be sent in as promptly as possible, since we usually have only **one** copy. If you have a second and third choice, please indicate. Where we cannot fill an order, we try to refund promptly - or will apply the amount sent, in any way you may instruct. -(Sorry, but we cannot keep pending list on books wanted.) -

The donations of used books, with privilege of sale, have come to be an important item in meeting BSR expenses. We appreciate this help and thank all donors. (Also, while we do get a bit in arrears with our orders, etc., at times--
--we greatly appreciate your patience in waiting.--Our detail work has increased--)
- ml)
